

[HPLC Conditions]

Column : CAPCELL PAK C₁₈ MGII S5 ; 4.6 mm i.d. x 150 mm

Inj. vol. : $5 \mu L$

Pretreatment : The standard compound was dissolved in methanol at 100

 $\mu g/mL$, and the content of the soft capsule was dissolved in methanol so that the final concentration be approximately 100

μg/mL.

 \Re 1 μ g/mL = 1 ppm
